

Summer – the perfect time to make sure you're on track

With the summer season and vacations upon us, you may now have that extra time available to review your semi-annual member statement online.

Canadians still spend more time planning a vacation than retirement (as confirmed in an RBC study published in May 2017). While an average vacation lasts two weeks, retirement may last 20 years or even longer, with increased life expectancy. It is important to take the time now to make sure you're on track for your future!

Your statement will provide you with some key information, including:

- how much you have saved for retirement
- the amount you and your employer have contributed to the plan during the past year
- whether you are on track to reach your retirement savings goal (if you have completed the on-line planner)
- where your retirement savings are invested
- your personal net rate of return – how your investments have performed after management fees have been deducted
- your plan's competitive investment management fees
- your beneficiary designation
- how to reach Reuter Benefits

Your statement can provide you with important feedback on your progress toward reaching your retirement goals and we encourage you to take full advantage of it.

If you would like to discuss those goals, or any of the information provided in your statement, contact Reuter Benefits by phone at 1-800-666-0142 or email us at retire@reuterbenefits.com.
